W. N. U., No. 838.

The Canadian Government Annuities Act.

The object of the Act is to promote habits of thrift, and to provide all persons, male or female, domiciled in Canada with a safe and sure plan of making provision for old age at the lowest possible cost. Deposit from time to time in any Money Order Office such sums as you can spare, for which purpose the Postmaster will supply you with a pass book; or you may, if you prefer, remit these amounts direct to the Annuities Department, in any manner that may best suit convenience. (If by cheque or Money Order, this should be drawn to the order of the Receiver General.) Upon your deposits 4 per cent compound interest will be allowed, and at the age of 55 (which is the earliest age at which an Annuity can begin) or at any later age desired, and of course the longer deferred the larger will be your income, such Annuity as the total amount then at your credit will purchase will be paid to you in quarterly instalments so long as you live. A definite amount of Annuity may be secured if specific sums are regularly paid. Should you die before the Annuity is due, all payments made will be returned to your legal representatives with 3 per cent compound interest; though the same payments will secure for you a larger Annuity if you do not wish to provide for this return.

If you have an amount at your credit in the Post Office Savings Bank, you may have this amount, or such portion of it as you may desire, transferred to the Annuities Department for, or on account of, the purchase of an Annuity.

The minimum Annuity which may be purchased is \$50, and the maximum is \$500. The earliest age at which the purchase may be begun is 55, but it may begin at any age thereafter. To each purchaser a contract or policy is issued, and a provident feature of the System is that there are no penalties or forfeitures. If payments should for any reason cease, they may be renewed at any time; and if arrears are not made up the only effect will be that a smaller Annuity will be secured.

A person over the age of 55 may buy an Immediate Annuity and a Last Survivor Annuity, Immediate or Deferred, may be purchased by any two persons by a single payment.

By paying a little higher rate all Annuities may be guaranteed for a number of years certain.

About 1,800 persons have availed themselves of the Act, and over \$890,000 have been paid into the fund. Every class of the community may be said to be purchasing. Twelve lecturers or agents are employed to present the features of the System to the public from the platform and otherwise and an office staff of eighteen is already necessary to handle the work. You bear no share of this cost, but every cent you pay in is placed at your credit for the purchase of your Annuity.

If you desire any further information on the subject this will be supplied you by the Superintendent of Canadian Government Annuities, Ottawa, to whom all letters go free of postage. Literature may be obtained at the Post Office.

When a medicine must be given to young children it should be pleasant to take. Chamberlain's Cough Remedy is made from loaf sugar, and the roots used in its preparation give it a flavor similar to maple syrup, making it pleasant to take. It has no superior for colds, croup and whooping cough. Of all dealers.

They Have a Great Opportunity

In the House of Commons four Western members have not yet indicated their attitude on the reciprocity agreement namely Dr. Roche (Marquette) Dr. Schaffner (Souris), John Herron (Macleod) and M. S. McCarthy (Calgary). It is to be hoped that they will support the agreement in the interests of their constituents and will then join the farmers in their demands for free implements and an increase in the British Preference to 50 per cent, at the present session. If they will follow the lead of Mr. Haultain they will be placing the welfare of the West above possible party advantage. The Western farmers are looking for men who will support them in their fight for justice. If these four men will stand by the farmers they will find the farmers will stand by them. If the West becomes divided against itself, progress will be retarded. These men stand with the farmers for government operation of the terminals and for the inauguration of a chilled meat industry. Their help will be needed to secure government operation of the Hudson's Bay Railway. Let us hope they will not weaken their power to aid the farmers by voting against reciprocity. They are undoubtedly in a hard position, but a man is always safe to place principle before party. A vote in favor of the reciprocity agreement does not approve of any other single plank in the government platform. The farmers in the constituencies represented by these gentlemen favor reciprocity and their members can help them greatly.—Grain Growers' Guide, Winnipeg.

Food Worth More Than Slaves' Lives

Pitiful stories telling of the suffering of the people in the famine stricken areas of China reach Shanghai daily. Sixty girls were offered for sale at one small town without a purchaser because the food the slaves eat was more valuable than their lives. Only death, therefore, awaits them.

Heavy rains have partially flooded the famine districts for the third time in two years, rendering most difficult the importation of grain for the relief of the starving thousands. In some cases the water is so high that it prevents the people from gathering herbs in the fields and also cuts them off from the relief stations.

Constipation being many ailments in its train and is the primary cause of much sickness. Keep your bowels regular and you will escape many of the ailments to which women are subject. Constipation is a very simple thing, but like many simple things, it may lead to serious consequences. Nature often needs a little assistance and when Chamberlain's Tablets are given at the first indication, much distress and suffering may be avoided. Sold by all dealers.

Homes for Neglected Children.

The department of neglected children does not have to beg for homes for its babies. The begging comes from the mothers, with now and again a father adding his voice to the appeal to the superintendent for a little child to brighten their home; and while the officials are anxious to satisfy this very natural longing on the part of childless people, careful investigation into home conditions must be made before this is possible.

As there are more requests for babies than there are neglected ones in Alberta (which in economic parlance means that the demands exceed the supply) the Department is in duty bound to select foster homes with the greatest care.

At present there are only three girls for adoption; Maggie a plump little Protestant lady, aged three and a half years; and two girls named "Mary"—one three years old (Protestant) and the other twelve years (Catholic).

There are more boys than girls just now for adoption. Among the Protestant boys there are two Clences—one five months old, big and strong for his age; and the other, two months old, a fine looking baby. Then there is Norman, aged three and a half, known in the shelter as "Bill," then come Arthur, Harold and Harry—each a month old, and Adrian a year and a half.

Of the Roman Catholic kiddies, there is Mick—a bright little chap of seven; Frank, aged four; Richard, only five months, and one called "Alberta," three and half years old. Alberta has blue eyes and fair hair, a type more sought after by applicants than any other. This name is generally given to little girls, but in the present case, the parents no doubt were so charmed with the province that they resolved to name their child, whether boy or girl, "Alberta."

The children are continually coming and going from the various shelters, so that if anyone wishing to adopt a child, will send a letter to the Superintendent of Neglected Children at Edmonton, giving a description of just the kind of child desired, the Department will be able, sooner or later to grant the request, and will endeavor to send the right child to the right home.

Lame Shoulder is nearly always due to rheumatism of the muscles, and quickly yields to the free application of Chamberlain's Liniment. Sold by all dealers.

Plenty of Holidays

With the addition of King George's birthday there are now nine statutory holidays in Canada. They are in the following order: New Year's Day, Good Friday, Easter Monday, Victoria Day, King's birthday, Dominion Day, July 1st, Labor Day, first Monday in September, Thanksgiving Day, fixed by proclamation, and Christmas Day. In addition Coronation Day, June 22nd, has been proclaimed a public holiday. Under the statute no interest can be charged on those days.

PHOSPHONOL

(The Electric Restorer)

MAKES WEAK MEN

STRONG

PHOSPHONOL restores every nerve in the body to its normal tension.

Nerves that have been dormant for years will vibrate once more with vigor. Two boxes of PHOSPHONOL have been known to make weak men feel as they did at eighteen.

Weakness is converted into strength where PHOSPHONOL is used; premature decay is impossible; sexual weakness is converted into strong manhood, both physically and mentally.

PHOSPHONOL is your medicine, regardless of your condition or age.

PHOSPHONOL is a new remedy prepared upon purely scientific principles, by expert chemists. It produces results.

PHOSPHONOL promptly dispels all forms of nerve weakness, such as lack of control, twitching of nerves and muscles, despondency, mental worry, blues, indecision, weak heart and impoverished blood.

Price: \$3.00 a box, or two boxes for \$5.00. We will mail this to any address under separate cover on receipt of price. THE PHOSPHONOL DRUG CO., St. Catharines, Ont.

The Man With A Millstone About His Neck

The millstone is a lack of special training. It holds one man down to hard work and small wages while others, properly trained, go ahead. But every man and woman who is laboring under such a burden can easily rise to a better position and increased earnings and can find out how for the asking.

To find out how, simply write the I. C. S., stating the position you wish to gain. In return, an institution with 17 years of successful experience in training thousands of others for advancement will tell you how it can fit YOU for a better-paying position. No risk to run. No books to buy. Isn't such a chance for advancement worth this much to you?

AFTER SUFFERING YEARS

Cured by Lydia E. Pinkham's Vegetable Compound

Fox Creek, N.B.—"I have always had pains in the joints and a weak knee there, and often after my meals in my food would distress me and cause soreness. Lydia E. Pinkham's Vegetable Compound has done me much good. I am stronger, digestion is better, and I can walk with ambition. I have encouraged many mothers of families to take it, as it is the best remedy in the world. You can publish this in the papers."—Mrs. WILLIAM BOUQUET, Fox Creek, N.B., Canada.

The above is only one of the thousands of grateful letters which are constantly being received by the Pinkham Medicine Company of Lynn, Mass., which prove beyond a doubt that Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, actually does cure these obstinate diseases of women after all other means have failed, and that every suffering woman owes it to herself to at least give Lydia E. Pinkham's Vegetable Compound a trial before submitting to an operation, or giving up hope of recovery.

Mrs. Pinkham, of Lynn, Mass., invites all sick women to write her for advice. She has guided thousands to health and her advice is free.

If the coal fire is low throw on a tablespoonful of sugar and it will be more easily brightened and rekindled.

To whom it may concern: This is to certify that I have used MINARD'S LINIMENT myself as well as prescribed it in my practice where a liniment was required and have never failed to get the desired effect.

C. A. KING, M.D.

If the world isn't better for you having lived in it, it ought to help some when you get out of it.

Sweet and palatable. Mother Graves' Worm Exterminator is good for children and it does its work surely and promptly.

The Duke of Brabant is performing daily operations in the Italian hospital, New York, having come to United States to study American surgery.

For Skin Health

A lifetime of disfigurement and suffering often results from improper treatment of the skin or neglect of simple skin affections. Cuticura Soap, assisted by Cuticura Ointment, affords the purest, sweetest and most economical method of caring for the complexion, preventing minor eruptions from becoming chronic, and speedily dispelling severe eczemas and other torturing humors, itching and irritations, from infancy to age.

Cuticura Soap and Ointment are sold by druggists everywhere. Foster Drug & Chem. Co., Inc. Free. Boston, Mass. Send for Cuticura Book on the care of skin and scalp.

W. N. U., No. 229.

SNAPPING A LYNX.

Ernest Thompson-Seton Tells of an Adventure With a Camera.

The camera is gradually replacing the rifle as a weapon for sportsmen. It does not bag the dead carcasses of beasts, but it secures what is more valuable, a record of their appearance and habits in the living state. The very act of making the photographic "shot" also discovers traits in the wild subject that a powder-and-ball hunter would never suspect. Ernest Thompson-Seton tells in Scribner's of a surprising revelation concerning the lynx. One of those supposedly savage animals had been driven from cover and cornered by Seton and two Indians.

He faced about at bay, says the writer, growling savagely, thumping his little bobbin from side to side and pretending he was going to spring on us. I took photograph number two at twenty-five yards. He certainly did look fierce, but I thought I knew the creature as well as the men who were backing up. I retired, put a new film in.

"Now, Preble, I'm going to walk up to that lynx, and get a close photo. If he jumps for me, and he may, there is nothing can save my beauty but you and that gun." Preble, with characteristic loquacity, said, "as it is the best remedy in the world. You can publish this in the papers."—Mrs. WILLIAM BOUQUET, Fox Creek, N.B., Canada.

Then I stopped and began slowly approaching the desperate creature we had at bay. His eyes were glancing at me. He was back; his small bobbin kept twitching from side to side and his growls grew harder and fiercer as I neared him. At fifteen feet he gathered his legs under him as for a spring, and I pressed the button, getting number three. Then did the demon of ambition enter into my heart, and lead me into peril. The lynx at bay was starving and desperate. He might spring at me, but I believed that if he did he would never reach me alive. I knew my machine, my nerves, and I said to him, "I'm not satisfied; I want him to fill the finder. Are you ready?"

So I crouched lower and came still nearer and at twelve feet made number four. For some strange reason, now, the lynx seemed less angry than he had been. "He didn't fill the finder. I'll try again," was my next. Then, on my knees, I crawled up, watching the finder until it was full of lynx. I glanced at the beast; he was but eight feet away. I focused and fired. And now, oh, wonder! that lynx no longer seemed annoyed; he had ceased all growling and simply looked bored.

We stood aside; he saw his chance and dashed for the tall timber. As he was, I fired the last film, getting number six, and so far as I know that lynx is alive, and well, and going yet.

A Great Geographer.

In an article under this title, in The Geographical Journal, Mr. B. H. Tyrrell gives an outline of the work of an explorer of the old type. David Thompson was a Welsh paragon. When seven years old he was placed in the Grey Coat School, a London boarding school, which was in existence. He studied here for seven years, learning the rudiments of navigation, which is in his life-time useful to him. In 1783 the Hudson Bay Co. applied "to know if this charity could furnish them with four boys against the month of May next for their settlements in America." Thompson was the only one available, and was apprenticed to the company for seven years, and was sent to Fort Churchill.

Thompson spent fourteen years with the "ancient and honorable" company, and during these two terms of service he surveyed most of the river tributary to Hudson Bay from the south and west, going as far as the east end of Lake Athabasca. In 1797 he made a long journey through all the principal water courses of the northwest.

His last years were spent either in Glenora County, Ontario, or in Longueville, opposite Montreal, where he died on Feb. 10, 1857, at the ripe old age of eighty-seven years. His wife, a child of the western country, whom he married at Isle a la Croix, on the Churchill River, survived him by less than three months, dying on May 7 of the same year.

Canada's Boundaries.

While the boundary between the United States and Canada follows for many hundreds of miles the River St. Lawrence and the Great Lakes, there is a vast distance of prairie land beyond with no natural demarcation. This is marked with pillars of iron and wood placed one mile apart. These are supplied alternately by the Canadian and the United States Governments, and run from Lake of the Woods to the Red River Valley. Beyond mounds of earth and cairns of stones are used as marks. The pillars are hollow castings, eight inches square at the base, four at the top. Inside are well-seasoned cedar posts. Each pillar is inscribed in raised letters on the north, "Queen's of London"; on the south, "Oct. 30, 1818." The stone cairns are seven feet high, eight feet at the base and shaped like a pyramid. Earth is used where stone is not available.

Canada's Available Water Power.

According to official estimates made by the Department of the Interior, the available water power of the Dominion of Canada are capable of developing energy representing more than 25,000,000 horsepower, which if produced from coal would represent a consumption of more than 250,000,000 tons per annum, at the rate of 21.9 tons of coal to the horsepower.

A Profitable Flock.

Hugh Ferguson of Eversley marketed the other day 45 chickens weighing 321 pounds, for which he received \$6.25.

A Lucky Diver.

W. H. Ross of Collingwood recently found a pearl worth about \$150 among some oysters.

Coronation Gift to King George V. The loyal subjects of His Majesty in every clime, the British Empire, bearing the Christian name of George, are invited to unite in making a gift to His Majesty on the occasion of his coronation, the most auspicious event of his life.

The contribution may be as small as a penny, but in no case may it exceed five dollars. A list of the names of all donors, but not the amount given by each, will be sent to the King, who will decide what form the present is to take. From the interest already aroused it is anticipated that there will be a liberal response, and that a sufficient sum will be raised to pay for a handsome personal ornament and still leave a large sum to be devoted to charity.

His Excellency, Earl Grey, is taking the interest in this fitting tribute, and at his request, His Honor, Sir Daniel H. McMillan, is initiating the movement in Manitoba, and consents to allow all sums contributed in this province to be sent to him at Government House.

The mayors and Reeves of cities, towns and villages, the public school teachers, members of Canadian Clubs and other patriotic societies are cordially invited to co-operate in bringing to the royal project to a successful conclusion.

The last day for receiving contributions is April 23rd, and if this province is to make a creditable showing no time is to be lost. There is no set method of work. Each city, town, school or patriotic society may work as it thinks best. All letters containing contributions are to be addressed to:

SIR DANIEL H. McMILLAN, Government House, Winnipeg.

Envelopes also to be marked C. G. K. G. Any further information may be had on writing to R. H. Smith, Hon. Secretary, C. K. G. Winnipeg.

Winnipeg, March 15, 1911.

The world won't let us practice Christian Science on our debts.

Braid of cheek material is best mended by using several shades of silk or in one needle.

Feeding is fatal to genius and besides geniuses don't deserve it.

Nature's Cure for a Cough

Dr. Chase's Syrup of Linseed and Turpentine is the Most Largely Imitated Medicine in the Country.

What to give the children for croup and colds is the problem mothers now have to solve. Most of them finally decide on Dr. Chase's Syrup of Linseed and Turpentine, and make it a rule to always have some in the house.

This medicine are linseed, turpentine and other well known ingredients of unmistakable value in the cure of colds. It is pleasant to take, so much so that children delight to use it.

So generally is this great medicine used that several imitations have been put on the market. All alike in name only. They are not made from the same formula, nor do they bear the name of Dr. Chase.

You know what you can expect from the use of Dr. Chase's Syrup of Linseed and Turpentine, but you can not put much faith in an imitation which sells on the reputation of the article it imitates.

On every bottle of the genuine will be found the portrait and signature of A. W. Chase, M.D., the famous Receipt author. This is for your protection and for the protection of your children. Be sure to get the genuine, even if it costs a few cents more. 25 cents a bottle, family size 50 cents; all dealers or Edmondson, Bates & Co., Toronto.

Sidetrack fair weather friends for saving your money for a rainy day.

There's a lot of gasoline wasted in family arguments.

FROM EVERY CORNER OF THE DOMINION

COME REPORTS OF CURES MADE BY DODD'S KIDNEY PILLS.

Magdalen Islands, Quebec, tell of Mrs. Cormier, a sufferer for six years, who was cured by Dodd's Kidney Pills.

Amherst Island, Quebec, tell of Mrs. Magdalen, Que. (Special).—That suffering women in all corners of Canada are being restored to health by Dodd's Kidney Pills is shown in the press every day, and this island is not without its striking example.

Mrs. F. Cormier, a well known and estimable resident tells the following story of her cure: "For six years I suffered with Rheumatism, Backache and Nervousness. I could not sleep nor eat, and I was always tired. My limbs were heavy and I had a dragging sensation across the loins.

"Hearing of cures by Dodd's Kidney Pills I decided to try it. Seven boxes made a new woman of me."

For a score of years Dodd's Kidney Pills have been in use in Canada. They have been tried in thousands of cases and there is not on record a single case where they have failed to cure diseased kidneys. Thousands of Canadian men and women will tell you they owe their good health to Dodd's Kidney Pills.

COCKSHUTT DRILLS

ENGINE GANG, NEW JEWEL AND OTHERS—SEE DEALER.

A Close Shave. One of these men, a Calabrian named Morta, went to his partner's shop and tried to shoot him while he was engaged in shaving a customer. The bullet shaved the face of a boy who was waiting.—Egyptian Gazette. And very likely the lad had only dropped in for a hair cut.—Punch.

Shiloh's Cure

quickly stops coughs, cures colds, heals the throat and lungs. — 25 cents.

Every time your anger comes up your horse-power goes down. People seem to want to invest in everything but happiness.

Minard's Liniment relieves Neuralgia.

Many a man who is willing to be a sound world object to being called one.

Sleeplessness—Sleep is the great restorer and to be deprived of it is vital loss. Whatever may be the cause of it, indigestion, nervous derangement or mental worry, try a course of Parole's Vegetable Pills. By regulating the action of the stomach, where the trouble lies, they will restore normal conditions and healthful sleep will follow. They exert a sedative force upon the nerves and where there is unrest they bring rest.

How to the line, but see that the line is in the right place.

Five thousand Japanese joined in a lantern celebration of Washington's birthday at Honolulu.

To clean silk and woollen clothes of grease spots, they may be gently rubbed with a cake of magnesia, laid away for several days, and then shaken out. It will not hurt to press the magnesia in with a hot iron, first covering the fabric with brown paper.

Minard's Liniment Cures Dandruff.

A strange fact about coal is that it is always delivered to both the buyer and the cellar.

A BOOK FOR MOTHERS.

Every mother is naturally anxious for information that will enable her to keep the little ones in good health. The Dr. Williams' Medicine Co., has issued a little book which contains a great deal of information on the care of babies and young children that every mother ought to know. The book will be sent free to any woman who will send her name and address, with the name of this newspaper, to The Dr. Williams' Medicine Co., Brockville, Ont.

The Cynic—"I suppose she is all the world to you?" The Lover—"Not exactly; but she's all I want of it—5,000 acres and an Elizabethan mansion!"

To keep a parasol looking well have a bag for it hung inside the closet door where the dust will not get at it. Brushing a silk parasol soon wears it out.

PILES CURED IN 5 TO 14 DAYS. Your druggist will refund money if PAZO OINTMENT fails to cure any case of Itching, Blind, Bleeding or Protruding Piles in 5 to 14 days. 50c.

Chiropodists say that a shoe that will not allow the great toe to lie in a straight line should not be worn if it is desired to avoid bunions.

The merits of Bickle's Anti-Consumptive Syrup as a cure remedy for coughs and colds are attested by scores who know its power in giving almost instant relief when the throat is sore with coughing and the whole pulmonary region disordered in consequence. A bottle of this world-famous Syrup will save doctor's bills and a great deal of suffering. Price 25 cents, at all dealers.

Bent whalebone, the genuine article, may be straightened by soaking before used in boiling water for a few minutes and then ironing it straight.

Shiloh's Cure quickly stops coughs, cures colds, heals the throat and lungs. — 25 cents.

A savory breakfast dish may be made as follows: One large cup of calves' liver and bacon minced, half of a sweet green pepper cut fine, all browned well in a pan liberally greased with butter and then four eggs stirred in until the eggs are set.

CANADA CEMENT COMPANY, LIMITED.

Annual Report of the Board of Directors.

TO THE SHAREHOLDERS:

Your Directors beg to present herewith the annual statement of the affairs and financial position of the Canada Cement Company, Limited, as of the 31st December, 1910.

In presenting the Balance Sheet, we call attention to the Company's strong financial position as disclosed by the large amount of cash on hand, and other quick assets, and the comparatively small amount of current liabilities. After providing for interest on our Bonds and Dividends on our Preferred Stock for the year, we have been able to set up reserves for depreciation, extraordinary repairs and renewals, bad debts, etc., and carry forward a substantial balance to Surplus Account.

The consumption of cement during the past year was not as large as anticipated. Our business also suffered on account of the Railways not being able to meet our full requirements for cars during the heavy shipping season; consequently, we carry over from last year 781,116 barrels of cement.

Early in 1910 the price of our product was fixed at a lower price than cement had ever been sold for in Canada, excepting for a short period in 1909, but your Directors are pleased to state that the anticipated savings in manufacturing and distributing our products were such that they were able to still further reduce this price.

We trust, when you consider the above mentioned conditions, and also the fact that during 1910 our plants were only operated to 57.6 per cent. of their capacity, the profits shown will be satisfactory to the Shareholders.

During the current year we look for a larger natural demand, which demand will be stimulated by continuing to manufacture a strictly high grade article, and by selling it at the lowest possible price. This anticipated increase will enable us to operate our plants to better advantage than in the past, but we do not expect that the demand will be sufficient to enable us to put into operation either of the two plants which have been idle since the organization of this Company. However, it is confidently expected that the increased demand, and increased output, will result in further savings in the cost of manufacture and distribution, and it is the policy of your Directors to give your customers the benefit of these reductions.

The Shareholders' profits will depend on the increased volume of the Company's business, the policy of the Company being the maintenance of such a stable position as will insure regular and uniform payments of interest on its bonds and dividends on its Preferred Stock, and at the same time be in a position to withstand any unforeseen emergency that may arise consequent on business depression or otherwise, which condition naturally necessitates the accumulation of, and the maintenance of, a large cash reserve.

It is also the policy of the Company to equalize the price of cement throughout Canada in so far as the physical conditions make such possible, and in furtherance of this policy, your Directors have arranged to purchase a site near Winnipeg, on which they will erect, this year, a mill to grind clinker, which clinker will be shipped from one of our Eastern mills. The buildings, machinery, etc., will be planned so that, should it at any time in the future be advisable, a Burning Department can be added, and the clinker produced on the property.

And further, an agreement has been entered into whereby this Company expects to acquire, in the near future, a property at Exshaw, which, added to our Calgary plant, and the projected plant at Winnipeg, will put us in the position of anticipating any extraordinary growth in the consumption of cement in the Great West.

With a view of educating the public, and popularizing the use of cement, in addition to the ordinary advertising, the Company has published a small book illustrating some of the many uses to which cement may be put, for which book there has been a great demand, 25,000 applications for same having been received during the past six months.

For the purpose of stimulating interest in the Company on behalf of the Employees, both in efficiency and cheapening production, as well as creating a feeling of mutual goodwill, your Directors deem it expedient to introduce a system, already adopted by several large industrial corporations with beneficial results, viz., to enable employees to become the possessors of Preferred and Common Stock at prices which will be attractive to them, the employees paying a fixed amount per share per month out of their earnings, and the Company carrying the stock for them, charging a rate of 5 p.c. interest. If the plan is put into effect, all dividends will be credited to the employees applying for the stock. Said stock will be held in trust for the employee for a term of five years, excepting in exceptional cases, such as death, when his heirs will receive what benefit a deceased employee has derived from subscribing to the stock.

Your Directors feel that the policy, as herein outlined, will, as nearly as possible, make the interests of the consumers, the employees, and the shareholders identical, and will insure to the most enduring and beneficial results for all concerned.

All of which is respectfully submitted,

On behalf of the Board of Directors,

WILLIAM C. EDWARDS, President.

TOM'S ESCAPE

TOM BROWN was the son of a pioneer. His home, a snug little cabin, stood, with two others precisely like it, in a clearing.

The Browns' nearest neighbors lived four miles distant down the river at a settlement known as "Hopper's Clearing." Travel was neither easy nor safe in those days, and although Tom had made the trip several times, he had always gone under the protection of his father or a neighbor. These events had been recollections of fun and excitement to him, for there was always the danger of capture by the Indians, who indicated the region.

One sunny morning in spring two white-faced men staggered into the Brown cabin and, although Tom had been recollections of fun and excitement to him, for there was always the danger of capture by the Indians, who indicated the region.

Knock man down, try to scalp him, only because full of water. My people want to go on warpath. Crazy old with firewater."

"Won't you get into trouble for setting me free?" asked Tom.

The Indian laughed.

"They forget they capture you tomorrow. I want to be friends with white man, come."

He showed Tom how to lie on his stomach and wiggle along with a curious snake-like movement. With the craft of a born woodsman, Tom could move as well as his teacher.

Slowly the boys wriggled their way out of the circle of heavily breathing men, stopping often as the warriors stirred in their uneasy slumbers.

Once in the forest path, Tom turned to his rescuer and held out his hand.

"You brave boy," he said, laughing. "We no want our people kill each other just now, do we?"

"We sure don't," answered Tom. "You're a good sort. If I ever can do anything for you or your people, let me know."

"I will," said the Indian.

"How do you learn English?" asked Tom curiously.

"I not Indian, all I white baby adopted by this tribe. See?" and he rolled back his cloth at the neck. The skin was brown, but no answer to Tom's. The boy laughed at Tom's exclamation of amazement.

"They used to tell me," he said, "I love this people."

"Come home with me," said Tom earnestly. "Don't waste your life with savages."

"No," said the lad, "I love my people. They are good to me. The white people can't see that."

For a moment his dark eyes looked fierce. Then nodding his head, he glided away, leaving Tom standing in the pathway.

Some days later Tom told the story to a number of men gathered in his father's cabin. One of the listeners, a hardy, wiry-looking Frenchman, listened hungrily to every word, asking all manner of questions. That night he left the camp and was not heard of again until five years later, when during the Black Hawk war Tom stumbled across an elderly Frenchman and a young fellow who looked enough like him to be his son, dead on the scene of battle, dressed in the garb of the Indians. Sleeping close to the young face, Tom realized

that he had arrived upon the scene just in time to prevent his being scalped. It was their opinion, they said, that the tribes were making ready to go on the warpath, and they told Tom he had best barricade the cabin against sudden attack.

After they had gone, Tom made a brief examination of his father's inert body. He made up his mind that, although there was no immediate danger, it would be far safer to procure a doctor. Tom sat on the side of the pallet to think. Tom was the question. The men in the cabins were needed, every one, to protect the women and children.

Tom listened anxiously to his father's heavy breathing, and a sudden brave resolve came into his heart.

He reached for his father's rifle, but on second thought put it down again. He knew that his aim was poor and that it would be safer to go unharmed by a heavy rifle, trusting to the swiftness of his legs instead of to weapons.

The lad crept to the door, opened it and closed it softly behind him. A glance at the sun showed him that the day "a well on its course. With the peculiar long, swift, easy stride of the backwoods, the boy swung into the forest trail.

His nerves were strung at high tension; every quiver that darted across his path struck terror to his soul, every swaying of bushes in the wind was to his excited mind the movement of a dusky body.

It was dark, and the boy found the trail harder to keep to. He forgot caution and cracked branches and thrust aside bushes without thought of danger in his eagerness to reach the "clearing."

He was within a mile of his destination when suddenly two big arms shot out from the underbrush, seized him and dragged him roughly from the trail. Bravely Tom conquered his impulse to scream or struggle, realizing that resistance was the surest way to antagonize the warrior. So, ruthlessly he was dragged without a cry from his lips. Finally the warrior dragged him into a circle of savages, who sat grotesque in their warpaint, around a huge fire.

Tom determined on his course of action at once. Pulling himself together, he walked up to the chief.

"How?" he said, then turned and sat cross-legged by the open fire, gazing into the blaze with all the stolidity he could muster.

An approving grunt swept the circle.

After a time Tom allowed his eyes to travel round the faces. They finally encountered those of an Indian lad about his own age, who rose and came lightly forward. "How?" he said, and smiled, holding out his hand, while muffled his gun.

Conquering his astonishment, Tom shook his hand warmly and tried to engage him in talk.

But the lad only smiled and answered "How?" to all questions. As the night advanced, the hideous group wrapped themselves up one by one and fell into heavy slumber. Tom stretched himself on the ground, giving a contented sigh at the benefit of any Indian who might be listening.

Tom now had leisure to think. He realized that the Indians were in an unusual condition, stupified as it were, and he wondered if he had better risk all in a sudden swift dash for liberty. He had almost made up his mind to do so, when, changing to him, he found the Indian lad at his elbow.

Tom drew back in alarm, but the boy uttered a reassuring word, and made him lie down at the same time.

"Go away now," said the Indian, and all fell fast asleep. Tom lay listening, but drew no nearer the "Hopper's Clearing." Many times

he tried to rise, but the boy would not let him. He lay there, waiting for the dawn, and when it came, he was ready to attack any living thing in

the clearing.

He lay there, waiting for the dawn, and when it came, he was ready to attack any living thing in

the clearing.

He lay there, waiting for the dawn, and when it came, he was ready to attack any living thing in

the clearing.

THE iron gates of the gym old castle, by the sea, swung open, and through them passed an old, old woman and a little girl.

"Oh," said the child sadly, "I'm so lonely here! Can't we go down to the beach by ourselves and explore the caves?"

"I should love it, my princess," said the woman, "but we must not forget that your enemies are angry and dangerous. It would be a very imprudent thing to do."

"All nice things are imprudent," pouted the child.

"I wish I were just an ordinary girl instead of a princess," she stood looking out to sea, where suddenly a twinkling of mischief came into her blue eyes.

"I wish to go back to my room," she said, "and lie down to sleep. I'm full of anxiety that the child was ill, the nurse hurried her back to the castle."

Alone in her room, the princess wriggled out of her fussy frock and donned a simple sailor costume; then she tucked her head under a white towel and slipped to the window and looked out; the coast was clear.

It was the work of a moment for her to climb on the window sill and from there on to the strong tree, which was thick as the branch of a tree with age. Carefully but fearlessly she descended to the earth. Suddenly she stopped short, remembering that every exit led to the beach from the castle was well guarded. In a disappointed fashion she turned to go back when she remembered an old orchard behind the kitchen garden. She dodged round the corner of the house and soon found herself in the orchard.

Here she had a jolly time climbing the trees and running about. Finally she came to an old mistle-grown rock and stood idly kicking it.

Suddenly and without warning it flew back on grooves, and she almost fell into a round dark hole; she started back, but a moment afterward was bending eagerly over a shaky, decayed-looking ladder which led downward. Then she began to descend. As her weight struck the seventh step she heard the stone overhead roll back into place. Evidently this was a mechanical arrangement. The child now found herself in almost total darkness. This bothered her until she remembered the small electric lamp in the pocket of her suit.

Holding the contrivance high overhead, the child saw that she was in a wide, uneven passageway that seemed to be carved out of solid rock. Although it was damp and dark, she felt no fear.

She had gone some distance down the passage, when she was confronted by a large door heavily bound with iron. Setting down her light, the princess picked up a sharp-edged stone and loosened the hard crust of earth which had formed about the door.

She gave it a final shove, and it swung creaking back.

The chamber found herself in a square chamber.

Her light, held high, cast queer shadows over the rocky walls and outlined the grotesque fashion a chess in one corner. With an exclamation of surprise, the princess started toward it. She tugged at the lid until it flew up, disclosing to her wide eyes the most beautiful jewelry, the most wonderful vases and vessels of gold and silver, curiously carved, she had ever seen. Faintly, the princess recalled old tales of the pirates who long ago had stored their treasure in the caves along the beach. She realized that she had probably stumbled across the secret cave of some cruel old seadog, who had spent his life in amassing these precious things and then, perhaps, had gone to

higher, and the child was almost in despair, when suddenly the rock gave way, and the princess stumbled blindly through an opening. Though she had lost all hope of escape, she started once more, for she had found the passage leading precisely like that by which she had come. At last her journey ended in a small square room.

Of the children of the earth, who had strayed into the world of the "Little People" and had been taken prisoner.

Every day for a long, long time the princess visited the young knight in his dungeon. And as time passed, she grew to love him dearly—and he, too, loved her.

Four after hours would she sit by Galanthus (that was his name) side while he told her beautiful tales of the great world whence he had come and the workings of the "Little People."

The month flew by as a single day to the young knight, and the happy knight and before they knew it spring was on the wing.

One day the young knight, who had been told that the South Wind was in the world, decided to go and see it.

He went to the South Wind and told him that he was the "Little People" and that he was the "Little People."

He went to the South Wind and told him that he was the "Little People" and that he was the "Little People."

The Magic by the Sea

his long sleep in a watery grave before having a chance to tell any one of its whereabouts. After a while the princess realized that it was growing late, that she would be missed.

She went along the passageway to the ladder. When she had reached the top she realized that the stone was too heavy to roll back.

A feeling of suffocation almost overcame her. She was caught—trapped in this underground world! A thousand horrible thoughts crowded her mind. Suppose she should starve, to death, here in the midst of the pirate hoard!

Slowly the princess descended the shaky ladder. Suddenly a thought came to her: If this were a pirate cave, it must have some entrance by way of the sea. Perhaps one of the caves on the beach was the outlet.

At the far end of the treasure room she found a door similar to that by which she had entered. With night and main the princess struggled until it swung back. Scarcely had she time to pass through, when it closed with a heavy thud. Startled, the princess looked back, but what had been the door now resembled a solid wall of rock.

Curiously she turned back to find where the door began and where the rocky floor was in vain; it was a masterpiece of cleverness.

Looking down the corridor, the princess saw that it was very much like that which she had passed leading to the treasure room; but the ground was curiously smooth and the walls and the salt smell of the sea struck her eagerly nostrils.

Her search was in vain; it was a masterpiece of cleverness. Looking down the corridor, the princess saw that it was very much like that which she had passed leading to the treasure room; but the ground was curiously smooth and the walls and the salt smell of the sea struck her eagerly nostrils.

Weak and exhausted from fright and weariness, her hands torn and bruised with the struggle, the child fell in a sobbing heap on the sharp, rocky floor. Soon she buried her head in her arms and sank into a deep, dreamless sleep. When she awoke, she realized that she had slept for some hours. She lighted her

Old Country Investors Look Toward Dominion

Fred W. Heubach, head of the firm of Heubach, Finklescin and Heubach, returned from his European trip. Mr. Heubach said:

Investors in Great Britain, Germany, France, and in fact throughout Europe are optimistic so far as Canada is concerned. Capital in all these countries is looking for good Canadian investments. City properties, well situated, in any of the rapidly growing communities throughout western Canada are popular; although perhaps at present the most popular form of investment from a speculative standpoint is farm lands.

As far as immigration is concerned, there is only one thing which can be said, and that is that every steamship which can be pressed into the Atlantic service has its capacity already booked far into the latter part of the season with future citizens of Canada.

I met a great many people interested in financial and commercial matters who had visited western Canada during the past year and I found them optimistic regarding its future. The majority had an opportunity of seeing at first hand by personal inspection just what was going on through the country, and in other cities and towns in the west.

Scarcely a day passed while I was in London that someone did not call on me or write me to have their names included on the Industrial Bureau mailing list. Fortunately I had with me a fairly complete selection of our printed matter and the favorable comments that were passed by all regarding the comprehensiveness and attractiveness with which the information had been compiled was extremely gratifying.

A great many of the leading journalists reproduced facts, figures and cuts from the data provided, and the editors of these publications informed me afterwards that nothing they had hitherto been able to get from Canada was doing as much good in the way of publicity for the whole west.

From an imperialistic standpoint the efforts of the bureau regarding assistance given to workmen in bringing out their families to Canada were met

with surprise and unqualified approval.

With regard to the cities in the old lands that I visited, there is one feature which particularly impressed me, and that was the evident competition there is one with another to beautify the streets, the boulevards, and to provide sufficient funds to keep up their parks and recreation grounds.

In cases of rheumatism relief from pain makes sleep and rest possible. This may be obtained by applying Chamberlain's Liniment. Sold by all dealers.

Mine Expects To Close Down

Gus Smith, manager of the Corbin Coal & Coke company whose mine is situated just over the summit of the Rocky Mountains at the eastern end of the British Columbia Eastern Railway, which extends from McGillivray, at the head of the loop on the Crow line, stated that his company are getting out about seven hundred tons of coal per day now, but that he expected the mine would be shut down tight upon the expiration of the agreement with the mine workers, which occurs upon the eighth of May. If this should occur, there will be almost a complete cessation of coal mining throughout the entire territory over which the jurisdiction of district 18, U. M. W. of A., extends.

"Vessels Large May Venture More, but Little Ships Must Stay Near Shore."

The large display ads. are good for the large business and the Classified Want Ads. are proportionately good for the small firm. In fact many large firms became much the better for the use of the Classified Columns. There example is good—start now.

"Our baby cries for Chamberlain's Cough Remedy" writes Mrs. T. B. Kendrick, Racine, Wis. "It is the best cough remedy on the market for coughs, colds and croup. Sold by all dealers."

Synopsis of Canadian North West Mining Regulations

COAL—Coal mining rights may be leased for twenty-one years renewable, at an annual rental of \$1 an acre. Not more than 2,500 acres can be leased to one applicant. Royalty five cents per ton. The coal mining rights under 2,500 acres may also be reserved for a period of two years for prospecting purposes. Fee \$100.00. An expenditure of at least \$1 an acre must be made by recognised methods of prospecting each year.

QUARTZ—A person eighteen years of age and over, having made a discovery may locate a claim 1,500 feet by 1,500. Fee, \$5. At least \$100.00 must be expended on the claim each year, or paid to the Mining Recorder. When \$500.00 has been expended or paid and other requirements complied with, the claim may be purchased at \$1 an acre.

PLACER MINING CLAIMS are 500 feet long and from 1,000 to 2,000 feet wide. Entry fee, \$5. Not less than \$100.00 must be expended in development work each year.

DREDGING—Two leases of five miles each of a river may be issued to one applicant for a term of 20 years. Rental, \$10.00 a mile per annum. Royalty, 2 1/2 per cent. after the output exceeds \$10,000.
